The Human Story

This Is Ravi's Reality

"It's 7 AM. Ravi woke up at 5.
Charged his bike. Put on his rain gear.
Opened Swiggy.
By noon — he made ₹0.
Not because he stopped working.
Because the sky did."

This is every monsoon . Every heatwave . Every smog alert .

Swiggy Earnings

₹0

Orders Completed: 0

Hours Online: 6.5 hrs

Weather: Heavy Rain

"The app is open. The rider is ready.
But the world said no."

The Problem

The Crisis No One Is Solving

India's gig economy is bleeding — and insurance doesn't see it.

12 Million

Gig delivery workers in India
with zero income protection

20–30%

Monthly income lost during rain, heatwave, pollution, app crashes

3 Weeks

How long traditional insurance
takes to pay a ₹500 claim

"No insurance product in India covers this. Until now. "

User Personas

Meet Our Users

Ravi Kumar

Full-time Zomato Rider

- Okhla, Delhi
- Earns ₹800/day
- Family of 3
- Loses 4-5 days every monsoon

"Main sirf kaam karna chahta hoon."

(I just want to work.)

Amit Sharma

Part-time Swiggy Rider

- Gurugram, Haryana
- College Student
- Rides evenings for pocket money
- Stuck outside dark kitchen on app crashes

"One crash, one night lost."

Every gig worker's fear.

They don't need sympathy. They need a system.

The Solution

Introducing Smart Income Shield

AI-powered parametric income protection — built for India's gig workers. Not a policy. Not a form. A safety net that works before you know you need it.

WhatsApp-First
Zero app download required

₹49
Micro-Premiums
Weekly affordable pricing

Kavach AI
Pincode-level risk engine

Auto-Triggers
IMD, AQI, Downdetector

120-Second Payouts
Direct to UPI instantly

From Storm to ₹500
In just 120 seconds — no forms, no waiting.

The Process

From Storm to ₹500 — In 120 Seconds

Four steps. Zero human intervention. Zero paperwork.

1 ONBOARD

- WhatsApp "HI"
- Kavach AI scores zone
- ₹49 via PhonePe
- Active in 60s

60s
Coverage Active

2 MONITOR

- IMD API polled every 15min
- AQI levels tracked
- Downdetector spikes
- GPS cluster inactivity

15min
Polling Interval

3 TRIGGER

- Rainfall >65mm detected
- Red Alert fired
- Trust Score calculated
- Payout queue initiated

Auto
No Human Input

4 PAY

- Trust Score >0.75
- Auto UPI payout
- ₹500 in PhonePe
- WhatsApp notification

120s
Total Time

No human intervention. No paperwork. Ever.

AI Engine

Kavach — The Brain Behind the Shield

Kavach Pricing Engine

XGBoost Algorithm

Prices premium per pincode + shift pattern dynamically. Range: ₹39–₹79.

Outage Validator

Isolation Forest

Requires 50+ rider GPS inactivity cluster. Confirms real outage vs fake disconnect.

Trust Score Engine

6 Behavioral Signals

Weighted average = payout tier decision. Mathematically fraud-proof scoring system.

Trust Score Visualization

6 Signal Bars — Real-time Fraud Detection

GPS Match	98%
Cell Tower	95%
Accelerometer	87%
Shift History	92%
Sub Timing	78%
Device ID	99%

94/100

AUTO-APPROVE ✓

Adversarial Defense

The Market Crash Response

500 riders. GPS spoofed. Liquidity drained. **We saw it coming.**

Crisis Scenario
Coordinated attack: 500 fake riders spoof GPS, trigger false payouts, drain liquidity pool in minutes.

Our 6-Layer Anti-Spoofing Defense

1 Cell Tower Triangulation
GPS spoofed, towers can't be

2 Accelerometer Pattern
Sofa vs storm = different signals

3 Shift History Baseline
Never worked here? Flagged.

4 Temporal Analysis
Subscribed after alert? Pending.

5 Fraud Ring Detection
3+ signals across cluster = freeze

6 Weighted Quorum Voting
500 fakers × 0.1 weight = blocked

Our defense doesn't just catch individual fraudsters. **It catches coordinated syndicates. Mathematically.**

Pricing Model

Priced Around How Gig Workers Actually Earn

Dynamic pricing by Kavach AI — pincode level, not city average

Shift Pass

₹49

/ 24 hours

- Max payout: ₹500
- Covers: Rain + Heatwave

"Less than one cup of chai"

BEST VALUE

Weekly Pass

₹99

/ 7 days

- Max payout: ₹1,500
- Covers: Weather + App Outages
- Priority processing

Most Popular Choice

Monthly Pro

₹349

/ 30 days

- Max payout: ₹4,000
- Covers: All + Curfews/Strikes
- Premium support

"Full protection, full peace of mind"

Kavach AI adjusts pricing based on real-time risk per pincode

Technology

Built to Scale. Zero Cost to Start.

Modern tech stack leveraging free tiers and open source

Frontend

React
Vite
Tailwind CSS

Bot

WhatsApp Business API
Dialogflow

Backend

Node.js
Express
AWS Lambda

Database

Supabase PostgreSQL
users, policies, sessions, claims

ML

Python
scikit-learn
XGBoost

Oracles

IMD API
AQICN
Downdetector

Payments

Razorpay Sandbox
PhonePe UPI

Hosting

Vercel
AWS Lambda Free Tier

₹0
Total Infrastructure Cost

Everything runs on
free tiers and open source

Roadmap

Our 6-Week Build Plan

From ideation to alpha test — a clear path to impact

DONE
Phase 1

March 4–20 — Ideation

- Architecture designed
- DB schemas finalized
- WhatsApp flow wireframed
- Anti-spoofing strategy documented
- README submitted

BUILD
Phase 2

March 21 – April 4

- WhatsApp bot live
- IMD API cron job running
- Kavach XGBoost model trained
- UPI payments integrated
- Registration + claims UI working

SCALE
Phase 3

April 5–17

- Fraud detection deployed
- Admin analytics dashboard live
- 50-rider alpha test in Okhla
- 5-min demo video recorded
- Final pitch deck ready

Target: 50 riders in Okhla, Delhi
Real-world validation by April 17

Ravi doesn't ask for sympathy.
He asks for a system that **sees him** —
and catches him when the world
doesn't.
